

China All Access to Provide Multiple Emergency Safety Solutions to the World Exposition 2010 Shanghai

CHINA ALL ACCESS (HOLDINGS) LIMITED (“China All Access” or the “Company”, HKEx StockCode: 633), announced its Fire Alarm System (FAS) Solutions have been successfully shortlisted and selected as the security system for World Exposition 2010 Shanghai. China All Access also provides Dynamic and Stationary Satellite Communication Solutions to bureaus including the Shanghai Wireless Management, Fire Services and Medical Assistance. Such solutions will be of irreplaceable importance to the emergency safety of the World Exposition 2010 Shanghai.

The Shanghai Fire Management Bureau has adopted the Company’s FAS solutions and its related wireless data monitoring terminals to remotely monitor the operations of fire protection system and perform immediate fire alert in major buildings and stadiums in Shanghai. In addition, the system enables GIS immediate location of annunciators and information sharing among 119 control center and related fire squadron. The Shanghai Fire Management Bureau has also endorsed the FAS solution of China All Access to be applied throughout the security system of the World Exposition 2010 Shanghai.

Besides, the Company provides large-scale Stationary Wireless Mobile Monitoring Stations and Dynamic Satellite Communication Solutions to the Shanghai Wireless Management Bureau. Such solutions have been successfully applied for electromagnetism detection and emergency communications for the F1 Competitions held in Shanghai over the past few years and will be applied extensively for the World Exposition 2010 Shanghai, demonstrating its significant importance. Moreover, the Company’s Dynamic Satellite Emergency Communication Solutions have been officially put into operation for the Shanghai Medical Assistance Bureau and the customized vehicle will commence operation before the opening of World Exposition 2010 Shanghai to ensure emergency safety measures in place.

On the other hand, the Company’s Satellite Remote Monitoring and Data Collection Solutions, as well as Wireless Data Remote Monitoring and Collection Solutions have played an essential role for the SCADA system of natural gas pipeline network in Shanghai. The Shanghai Natural Gas Pipeline Network Co., Ltd (上海天然氣管網有限公司), one of the important safety management enterprises in Shanghai, utilizes the Company’s Satellite Data Collection Solutions, Wireless Data Collection Solutions, as

well as the related data terminals of satellite communication and wireless communication to form SCADA system.

The Company's Satellite Data Collection Solution and Wireless Data Collection Solution have become a vital solution to the pipeline network and safety operations of Shanghai Natural Gas Pipeline Network Co., Ltd. Planning and preparation have been launched in the Expo Park since the end of 2009 to ensure the safety supply of natural gas to the stadiums and the neighborhood of the World Exposition 2010 Shanghai.
