

**Traffic Offence Electronic Ticketing and Payment Solution**  
**Qualified as the Industry Standard of Traffic Law Enforcement Platform**  
**Software for National Traffic Management Department**

Traffic offence electronic ticketing and payment solution was developed by CHINA ALL ACCESS (HOLDINGS) LIMITED (“China All Access” or the “Company”, HKEx Stock Code: 633) according to the requirements of the traffic management department. Through the transmission of wireless data communication network, traffic management officer could use the terminal (“Jingwutong”) to interconnect with the databases of traffic management department and card payment settlement bank, and fulfill various functions such as data enquiry, printing penalty ticket, wireless payment and so on.

The Group has commenced the development of this solution since 2003 and launched the multifunction wireless terminal in 2006. As of today, the solution has been widely applied in the traffic management department of Hebei province and has received great appreciation from its front end officers. In view of its showcase effect and great impact, the research institute which is directly under the national traffic management department and is responsible for setting standards for traffic management industry, performed evaluation and assessment over the solution and finally certified it as the industry standard nationwide. We believe it is the recognition for the excellent track record of the solution. Besides, the recognition provides very favorable technology and policy support for the marketing promotion in China.

Besides Hebei province, the Group plans to promote the solution in two major coastal provinces in 2010. With the continuous market expansion, we are confident that this solution will become a new highlight of our group’s business development.
