

## **China All Access Satellite Communication Vehicles Reinforced Firefighting in Dalian Oil Pipeline Explosion**

Provided by China All Access (Holdings) Limited (“China All Access” or the “Company”, HKEx stock Code: 633), the satellite communication emergency systems fully reinforced Hebei Fire Corps by assisting their frontline firefighting operations in a pipeline explosion incident at Xingang, an oil storage port in Dalian, Liaoning Province.

Qinhuangdao Fire Corps and Langfang Fire Brigade adopted the Company’s Dynamic Satellite Command Vehicle and Stationary Fire Communication Satellites Command Vehicle respectively in the operations of fire fighting to collect images of fire field on site. Communication vehicles collected real-time visual and audio data from high ground out of fire field under commander’s orders. The real-time data was then transmitted to the command center of Dalian Fire Corps at the first time. This first-hand information helped frontline commanders make best decision for operation. Having the fire information, the Ministry of Public Security gathered air force to cope with ground troops to put out the fire. Satellite Communication Vehicles of China All Access has provided precious information to Hebei Fire Department and has received great appreciation from public security department, demonstrating its significant importance on fire fighting.

China All Access has also provided emergency safety solutions to numbers of provinces and cities in China. The Company’s Dynamic and Stationary Satellite Communication Solutions are selected as the security system for emergency safety of the World Exposition 2010 Shanghai. China All Access

will continue to provide high quality communication application solutions to further fulfill society's needs in countering communication difficulties in extreme and disastrous situations.
